CONSTRUCTION UPDATE:

In early November 2015, a major milestone in our construction schedule will be implemented which includes a traffic shift in the Toll Plaza, two-way traffic on the east fork of the Connector Bridge between the Toll Plaza and Port Jersey Blvd., elimination of the 53rd Street traffic signal and the temporary 6-month closure of eastbound 53rd Street at the Toll Plaza (Ave. E). This work is scheduled to be implemented over the 11/06/15-11/08/15 weekend.

During the weekend of 11/06/15-11/08/15, there will be a temporary “hard detour” of Port Jersey Blvd. traffic heading to the Toll Plaza. This traffic will be diverted to Interchange 14B for the weekend while our contractor prepares the bridge for two-way traffic. Expect periodic slow downs exiting the 14A Toll Plaza.

The right turn onto southbound Avenue E and the entry to the Turnpike or Port Jersey Blvd. from 53rd street will be temporarily closed for a 6-month duration. During this temporary eastbound 53rd Street closure, motorists will be encouraged to use other eastbound cross streets further south to access Avenue E and the Toll Plaza. E. 53rd Street will remain open to local businesses including the QuickChek, Value City Furniture, and Bayonne Auto Repair. 53rd Street will remain open to traffic exiting from the Toll Plaza into Bayonne.

Motorists entering Bayonne via the 14A Interchange will have access to all normal destinations but will be directed to specific toll lanes in order to better facilitate the traffic flow. Extensive signage prior to the toll booth will aid in directing traffic to the destinations.

NEW TRAFFIC PATTERN AS OF NOVEMBER 9TH

Further updates and information will be added to the Project website at www.NJTA14A.com and disseminated through additional outreach efforts. Please contact our project office via phone or email with any questions. Details on the reverse side.
